Abstract (en)
[origin: EP0682895A1] The screen panel clip (3) has a U-shaped clamping arm (6). It is open towards the fixture plane (5) of the slide-piece (2), with a holder arm (14) shaped on one arm (7) of the clamping arm and parallel to the fixture plane of the slide-piece. The free end of the holder arm has a holder lug (15). The clamping arm clamps the clip into a circle-segment-shaped ridge (9) extending downwards at right-angles to the fixture plane and shaped on the slide-piece, concentrically to the holder sleeve (4). The ridge is the front end of the a groove (13) in the slide-piece and has one arm (8) of the clip clamping arm fitting into it. At least one of the arms of the clamping arm is toothed on the inside (10), while the ridge also has teeth (11). <IMAGE>
