Abstract (en)
[origin: WO9418300A2] An aqueous based cleaning composition, e.g. for textiles, comprises in addition to a major part of water, a surface active agent, a base and an organic acid, or a salt of a base and an organic acid, and a dispersed phase of a hydrocarbon. The hydrocarbon is preferably a terpene, most preferably limonene. The composition may be used for cleaning textile articles in a process which involves directing ultrasonic waves at the articles to be cleaned.
