Abstract (en)

[origin: EP0683998A1] The display panels (2), which fit together, are made from hollow profiles of synthetic material. They may be placed against a wall or dividing panel (1), or against special supports, with the longitudinal edges of two panels (11, 12) fitting together. Longitudinal grooves (4) receiving accessories are formed in the panels at the edges where the panels are joined together. Within these grooves there may be electrical conductors (14, 15, 16, 17), so that the accessories may include the bases of light fittings. The light fittings derive their power from the embedded conductors. <IMAGE>
