Abstract (en)

[origin: EP0684350A1] The fitting comprises a trim strip with a profiled front face (2) which lies over the edges of two adjacent wall panels. An inner flange has a fixed section (9) which has a ratchet grip (10) onto one side of a wall mounted support strip (17) while the other side of the support strip is gripped by a clip fastening flange (15) which clips to the rear of the fitting. The fitting has elastic seals to press onto the wall panels. The clip fastening fitting flange can easily be removed by prising behind the appropriate edge of the fitting. The fitting can then be re-used.
