Abstract (en)
[origin: EP0684425A2] The ring shaped fluorescent tube(1) is encircled toroidally by both reflector parts(4,5). Several anti-glare elements(3) are fixed at a distance to each other essentially the fluorescent tube(1), with one end respectively at one of reflector parts(4,5), whilst the other end of the respective anti-glare element projects freely. The inner end of the anti-glare element(3) is arranged essentially at the height of the fluorescent tube(1) at the inner reflector part(4). The end of the anti-glare element(3) fixed at the reflector(2), is fitted at the inner reflector part(4). <IMAGE>
