Abstract (en)  
[origin: WO9419114A1] A process for surface coating of plane surfaces in which on the material with plane surface chlorine-free paint- and lacquer materials is applied as wet paint in two layers, each layer being dried separately before the application of the next layer and where the total plane layer thickness is 40-300 microns, and then a plastic sheet is applied by lamination directly on top of the hot paint surface.
