Abstract (en)

The emergency bathing appts. comprises a liquid reservoir (1) under pressure equipped with an outlet valve (2) and a dispenser (3). The dispenser includes a regulating mechanism (6) for the jet of liquid issuing from the valve which is movable between one extreme position giving fine spray and a second extreme position giving a continuous flow. There can also be an intermediate position in which the outlet valve is not opened. The dispenser includes an eye bath (7) which functions when the regulator is in the second position to receive the dispensed liquid. <IMAGE>
