Abstract (en)

The chassis is formed with two side rails (1), with four half cross beams (2) mounted between the side rails. Two auxiliary rails (4) are mounted on the cross-beams, which also carry the brake supports (3), the drive attachments (5) and the suspension attachment brackets (6). Each of the component parts is produced as a single component and is produced in an aluminium alloy by conventional methods of forging, casting and/or machining. The pieces are either welded, screwed, adhered or riveted together. <IMAGE>
