Abstract (en)

[origin: EP0685391A1] The present invention relates to a machine for forming-filling packaging bags, in particular for packaging food articles, which comprises: a first section, provided with bag forming means, a second section, provided with bag filling means, and means for controlling the filling-in of the bags, and a third section, provided with means for vacuum sealing the filled bags. The second section comprises a bag bearing carousel, having a vertical axis, for receiving the bags formed in the first section, and for sequentially sending the formed bags to filling-in stations arranged on the periphery of the carousel; the third section being also constituted by a carousel which is provided with vertical axis sealed bell holders for vacuum forming and sealing the bags. The second section is arranged on the top of the third section. <IMAGE>
