Abstract (en)

[origin: EP0543711A1] A bridge element for crossing gaps by vehicles and a system for placing a bridge over the gaps to be crossed. The element is characterised in that it includes locking means comprising at least one pair of locking pins (11, 12) in one piece respectively with a liftable access projection (8) and a central hollow (7) of the bridge, extending longitudinally to the central hollow (7) along the same axis in the locked position of the access projection (8) and two components forming jaws (13) enclosing two heads (15, 16) opposite the two locking pins (11,12). Application notably in the area of military equipment. <IMAGE>
