Abstract (en)
[origin: WO9419444A1] The invention concerns the use of a concentrated granular detergent composition having a density of about 800 g/L or more comprising enzyme granulates characterised in that said enzyme granulates are present at a level of less than 20 g/L detergent composition, wherein said enzyme granulates have no negative impact on the whiteness of the detergent composition. Furthermore the invention relates to a concentrated granular detergent composition comprising enzyme granulates characterized in that the concentration of high alkaline protease in the enzyme granulate is at least 2 %.
