Abstract (en)  
[origin: EP0686569A2] The sheet blank is of opaque, tear-resistant material glued, via a bottom and a side flap, after folding. There is a closure flap with a strip-shaped adhesive layer coacting, after folding, with an adhesive layer on the envelope rear side. The counter-face on the rear side can be separated via a perforation from the rest of the rear side of the blank. Pref. the perforation is formed by spaced incisions or stampings. The latter are typically 1.0 to 5.0 mm long and spaced by up to 2.0 mm.
