Abstract (en)  
[origin: EP0686592A1] The device manufactures single or multiple print works one after each other between at least one product supply station and at least one product reception station in several reception positions (8,17,30,44,59). Each individual or all of the reception positions have at least one folding device having a pair of folding rollers (10,18,33,46,55,91). The folding device also has a fold centre-board (11,19,35,47,60) between the folding rollers. The reception positions are in the form of pocket parts whereby each adjacent part is divided by a wall element (7,16,31,43,54,92).
