Abstract (en)
[origin: EP0686735A1] The building structure face has a support construction comprising an aluminium support profile (1) with an inner chamber (2) of surrounding an aluminium hollow profile as posts and/or beam profiles. In between the profiles are fitted wall components, partic. fire protection plates (4). The edges (5) of the wall components, covering from their outside (11) are connected to the support profiles by cover profiles (12). In the inner chambers of the support profiles and with their outer flanks (16) directed towards the facade outer side support profiles (3) are fixed on the bearer profiles. At least the side flanks (19,20) and the building-side inner flanks (22) of the support profiles are covered on their outsides by a fire protection insulation (23). <IMAGE>
