Abstract (en)

[origin: EP0687032A1] The electrical connection terminal (10) consists of the cage (11) containing a contact plate (12) and a clamp screw (13). On its lower part the cage includes two protuberances which are arranged to cooperate with two elastic hooks (15) within the screen (16). The screen (16) consists of a rigid plate which may be made solid as part of the cage, in order to mask the opening part of the cage when a wire or cable of small diameter is fitted. The screen includes at least two elements (16a,16b) sliding one over the other. <IMAGE>
