Abstract (en)
[origin: WO9518900A1] A covering panel consisting of a metal cladding with a supporting structure (15) and cladding members (11) attached thereto by means of fastening screws (14). Said cladding members (11) consist of extruded aluminium sections and comprise quick fastening members (12) and locking members (13) for interconnecting said sections. The cladding members (11) are joined to the supporting structure (15) by evenly spaced longitudinal T-shaped sections (20) each having an axial longitudinal channel (21) with grooved walls for engagement with the screws (14) for fastening said cladding members. Said sections are adjustably spaced from the wall (22) by means of brackets (23) engageable with the longitudinal sections (20).
