Abstract (en)

[origin: WO9420222A1] A mounting comprising a fixed base (11) and a turret (12) rotatably mounted about a substantially vertical axis and provided with a spray device. Said base (11) and the turret (12) are provided with rotary seals enabling the pressurised air and water to flow therethrough. The lower portion of the base (11) includes a cavity for housing an assembly for controlling the turret (12). The assembly preferably consists of a motor using the pressurised air or water for supplying the spray device. An electric motor may also be used.
