Abstract (en)

In a method and a machine for inserting a plurality of components which are to be assembled to form a toy in a generally egg-shaped case, particularly for packaging gifts in chocolate eggs, the components (2a-2f) are placed on a sheet (1) of heat-shrinkable material in a predetermined sequence and the opposite ends of the sheet (1) are welded together so as to wrap the components (2a-2f). The sheet (1) is then heated so as to be shrunk to a predetermined extent, packing the components close together. <IMAGE>
