Abstract (en)

The base for the electrical relay is intended to be fitted to a panel (20), with the base on one side of the panel receiving the relay itself on the opposite side of the panel. The base includes ferrules (3,4) fitted with mountings (5,6), and a central block (2) with seals forming female electrical connectors (2). Two elastic tabs (7,8) are provided on the base, fitting through the hole in the support panel, and abutting the sides of the relay casing (30a,30b). The relay may then be retained by bolts (35) passing through lugs which project from its casing into the ferrules of the base.
