Abstract (en)

[origin: WO9519822A1] A floor covering, in particular for sport fields, based on elastic plastics, has a substantially flat top side (1a, 10a) on which one can walk and a bottom side (1b, 10b) spaced apart therefrom. The covering has an anisotropic elasticity in the desired running direction (6), so that it dampens more strongly the impact of the shoe (8) of a runner running on the top side (1a) in the desired direction than the impact of the shoe (8) of a runner running on the top side (1a, 10a) in the opposite direction.
