Abstract (en)
An adapter device to enable thermocouples with Faston type coupling to be mounted upon bodies (10) of valves or valved cocks adapted for mounting thermocouples with threaded coupling and comprising a conventional magnetic assembly (11) locked by means of a locking nut (12) and having a contact head (16), wherein said adapter device comprises : - a contact pin (24), having a front end head (25) adapted to engage the contact head (16) of a conventional magnetic assembly (11) and a rear end head (26) adapted to engage the contact head (27) of a thermocouple (28) provided with a Faston type coupling, as well as a front perimetral stop means; - an insulating bushing (29) inserted onto said contact pin (24) and having a front perimetral step formation abutted to the front perimetral stop means of said contact pin (24); - an externally threaded mounting nut (31) which is screwed within said magnet assembly locking nut (12) and pushes against said perimetral step formation of the insulating bushing.
