Abstract (en)  
[origin: WO9422942A1] A polyamide resin composition comprising 30-50 parts by weight of polyamide resin and 70-50 parts by weight of a combination of glass fibers and glass flakes and having a resin melt viscosity, when molding, of 50-200 Pascal seconds at a shear rate of 1,216 sec<-1>. The state of warpage of molded articles from the polyamide resin compositions of example 17 and control example 1 is shown in the accompanying diagram.
