Abstract (en)
The handle has a catch pin (7) which is mounted in a bushing (18) fitting into the hole (17) in the mandrel (5). The base (20) of the bushing is joined to the surface (21) of the mandrel. The catch head (16) has at least one flat part (24) formed by the surface (25) of the catch head. The cross-section of the opening (26) in the bushing base matches the cross-section of the catch-head. The other end of the bushing has a closure lid (19) and the mandrel has a protuberance. The mandrel cavity in the drive element has a matching longitudinal groove. The protuberance consists of a lug pressed out of the material of the mandrel. <IMAGE>

Abstract (de)
Die Erfindung betrifft einen Bedienungsgriff mit einer am Dorn angeordneten Kupplung zur formschlüssigen Verbindung mit einem Antriebselement. Erfindungsgemäß wird vorgeschlagen, am freien Ende (6) des Dorns (5) einen verschieblichen Rastkopf (16) anzuordnen, der das Antriebselement (10) nach der Montage des Bedienungsgriffs (1) hintergreift. <IMAGE>
