Abstract (en)
[origin: EP0692922A2] The loudspeaker housing (1) is divided internally into a number of chambers (6.1,6.2,7.1,7.2), provided as closed sound chambers (6.1,6.2) or as vented sound chambers (7.1,7.2) with tuned sound exit channels (8.1,8.2), tuned to different frequencies, acting as acoustic resonators. A pair of bass loudspeakers (4.1,4.2) are fitted in openings (3) in the separation walls (2.1,2.2) between the chambers, with a sound path between each loudspeaker and one of the sound exit channels. <IMAGE>
