Abstract (en)
[origin: WO9422740A1] A dispenser for dispensing plastic material from at least one cylindrical container unit (10). The dispenser comprises a carrier (13) with at least one manoeuvrable piston rod (20), which is connected to means for displacing the rod when dispensing said material, and a holder (14) for mounting the container unit in a fixed position for use, which position is coaxial with the longitudinal axis of the piston rod (20). The holder is provided with a connection device (29) for a neck piece belonging to the container unit, and a valve device (31) for opening or closing a feed out opening (34) for said material. The holder (14) with the valve device (31) forms a unit which is detachable from the carrier (13).
