Abstract (en)

[origin: WO9424210A1] Thermoplastic polymer blend compositions having low gloss in combination with improved processability and good physical properties comprise: a polycarbonate polymer; low levels of an epoxy-group-containing copolymer; at least one monovinylidene aromatic copolymer which is rubber-modified and produced via a mass process; at least one monovinylidene aromatic copolymer which is rubber-modified and produced via an emulsion process; and optionally additional monovinylidene aromatic copolymers.
