Abstract (en)  
[origin: EP0693381A1] The present invention provides a sheet convey apparatus comprising a belt-shaped convey means for supporting and conveying a sheet, and an absorbing force generating means disposed within the belt-shaped convey means for causing the sheet to be absorbed to the belt-shaped convey means. Wherein at least one of portions of the belt-shaped convey means and the absorbing force generating means contacted with each other is made of synthetic resin material having frictional coefficient  $\mu$  smaller than 0.4 ( $\mu \leq 0.4$ ) and water-absorbing rate A smaller than 0.4% ( $A \leq 0.4\%$ ). <MATH>
