Abstract (en)

[origin: EP0693409A1] The load transferring plant comprises consecutive stretches of overhead runways (4; 50; 51) defining together at least one transferring route for a load (2, 41, 42, 43) suspended from them; there is at least one shuttle (1) which is joined, with a rolling coupling, to the said overhead runways (4; 50; 51) which support each said load (2, 41, 42, 43), and which is equipped with a device (3; 53; 56, 57, 60) for connecting it with the load so as to effect its controlled transfer from a first starting position to a second position of arrival along the said at least one route.
