Abstract (en)

A metal or plastic clamp for electronic ballast apparatus used on fluorescent lamps is shaped so that it clamps the apparatus in a springy fashion. The clamp is U-shaped and there are two clamps for one ballast unit. The clamp width and height, plus the material thickness and type, are chosen so that the force used to remove the ballast unit is greater than five times its weight.

Abstract (de)

Es wird die Verwendung mindestens einer Metall- oder Kunststoffklammer zur Befestigung von elektronischen Vorschaltgeräten in Leuchtstofflampen-Leuchten vorgeschlagen, die derart geformt ist, daß sie das Vorschaltgerät federnd umfaßt.
