Abstract (en)

The filter has a defined transmission band and a high attenuation for frequencies outside this band, using at least 2 coaxial resonators (1, 2) for acting as band blocking devices. The coaxial resonators are connected in series and have resonance frequencies outside the defined transmission band, respectively lying above and below the latter. Pref., the filter uses a pair of halfwave resonators each having a metallised bore (3, 4) extending inwards from a respective end face of the resonator ceramic body. <IMAGE>

Abstract (de)

Mikrowellen-Keramikfilter mit einem vorgegebenen Durchlaßfrequenzband sowie mit einem Bereich hoher Dämpfung um eine vorgegebene Frequenz außerhalb des Durchlaßfrequenzbandes unter Verwendung von als Bandsperre und in Reihe geschalteten Koaxial-Resonatoren (1, 2), die von der vorgegebenen Frequenz abweichende Resonanzfrequenzen besitzen. <IMAGE>
