Abstract (en)

[origin: WO9423957A1] A device for aligning a graphic on a surface with respect to a fixed reference on the same or an adjacent surface. The device comprises a graphic carrier (12) which, in turn, comprises a graphic carrier release liner (24) and a first graphic. The first graphic includes opposed first and second major faces and is removably secured to the release liner at one of the major faces. A premask (26) is releasably attached to the first graphic at the other major face. The graphic carrier release liner includes means such as a perforated cut or a cut edge (32) for aligning the first graphic with respect to the fixed reference.
