Abstract (en)
[origin: WO9424258A1] The aim of the invention is to provide a washing agent which is based on enzymes alone and avoids, as far as possible, other usual washing-agent components, and which has a washing power at least equal to that of ordinary washing agents with an optimized composition. The enzymatic washing agent according to the invention contains protease, lipase, amylase and cellulase plus, optionally, small quantities of surfactants and/or builders. Washing agents with this kind of composition can be used as stand-alone washing agents or as washing auxiliaries in addition to ordinary washing agents.
