Abstract (en)

[origin: FR2678136A1] The present invention relates to a method and device for inserting wire extremities in electric components, as well as a device for fabricating electric wiring harnesses. According to the invention, a device for inserting extremities (70) of wire sections (5) into pockets (54a) of components (54) comprises means for displacement of components along a curved path with respect to wire extremities which are held by grips (7). The technical field of the invention is the fabrication of electric wiring harnesses.
