Abstract (en)

The flowers are held in a disc (1) which is pierced with regularly distributed holes (11,13) through which the flower stems are inserted. The holes (13) around the edge of the disc (12) have a smaller diameter than diameter of the holes (11) in the central part (10). The disc is made in transparent plastics with its edge (14) turned down to make it more rigid. The edge can be clipped on to the edge of a container. The disc's lower surface can be covered with a supple membrane with holes that are smaller than the stems. <IMAGE>

Abstract (fr)

Dispositif pour le maintien de fleurs coupées destiné à permettre la réalisation d'un bouquet rond. Il comprend un disque (1) percé d'orifices (11, 13) régulièrement répartis, dans chacun desquels est introduit l'une des tiges (2) des fleurs destinées à la réalisation du bouquet, lesdites tiges (2) étant regroupées et se croisant sous ledit disque (1). <IMAGE>
