Abstract (en)

[origin: EP0694670A2] The covering arrangement has a sealingly formed projection frame (22) with an endless hose seal (36) provided on the outer edges (23). The hose seal is watertight and inflatable, and variable in volume outside the frame. The projection frame is surrounded by a profiled channel (32) with an outwardly directed channel cavity (34) to receive the endless hose seal. Each corner of the frame has a separate seal corner (40) against which the hose can rest. <IMAGE>
