Abstract (en)

[origin: US6062430A] PCT No. PCT/EP94/01343 Sec. 371 Date Nov. 6, 1995 Sec. 102(e) Date Nov. 6, 1995 PCT Filed Apr. 28, 1994 PCT Pub. No. WO94/25371 PCT Pub. Date Nov. 10, 1994A dispensing container, comprising: a vessel body container and at least one reception container, the containers defining a container space sub-divided into substantially separated first and second space sections; the vessel body container defining a first container shape in the vicinity of the first space section, the first space section being adapted for receiving a first volume of a first medium; the second space section being adapted for receiving a second volume of a second medium, said first and second volumes being operationally variable; said second space section including a reception space, and being bounded by a section wall expandable to a full-size shape substantially corresponding to the first container shape, and, a pump for expelling at least one of the media with manually exerted pressure, wherein the section wall, when expanded, includes a region substantially free of tension.
