Abstract (en)
The infrared radiant element (1) incorporates a reflector (4) encompassing two infrared discharge tubes (3) in a housing with a rectangular or circular opening (8). The two tubes have separate controls so that they can be switched on and off and their intensities increased or reduced independently. A computer program allows for differences in length and style of hair in timing the operation of the tubes, according to whether or not a blower is in use and whether special treatment such as perming is called for.

Abstract (de)
Bei einem Haarbehandlungsgerät mit mindestens einem Strahlerelement 1, z. B. einem Infrarotstrahlerelement, sind mindestens zwei Strahlerquellen 2 vorgesehen. Diese Strahlerquellen 2, z.B. Infrarotstrahler 3, werden unabhängig voneinander angesteuert. Dadurch ist es möglich, die Strahlungscharakteristik eines Strahlerelementes 1 zu verändern. <IMAGE>
