Abstract (en)
Towel rail apparatus (2) which is constructed for connection to a central heating system (4) such that heated water in a central heating system (4) is able to pass through and heat the towel rail apparatus (2). The towel rail apparatus (2) comprises a towel rail (6) mounting means (8) for mounting the towel rail (6) in a desired position adjacent a radiator (10) in the central heating system (4), a first pipe (12) for connecting the towel rail (6) to the central heating system (4) of an inlet side of the radiator (10), a second pipe (16) for connecting the towel rail (6) to the central heating system (4) on an outlet side of the radiator (10), first connector means (20) for the first pipe (12), and second connector means (22) for the second pipe (16).
