Abstract (en)
A film transfer apparatus includes a feed core (1) and a take-up core (2) between and about which there is entrained a transfer ribbon (R) including on one side thereof a transfer film, a transfer head (3) for transferring, by pressing, the transfer film of the transfer ribbon (R) fed from the feed core (1) on to a transfer target surface, a holder (4) to which the feed and take-up cores (1,2) and the transfer head (3) are attached, a transfer ribbon cassette including the holder (4), and a casing detachably mounting the transfer ribbon cassette. Each of the respective cores (1,2) is rotatably supported, via one end thereof in the direction of ribbon width, to the holder (4). The transfer head (3) is also supported, via one end thereof in the ribbon width direction, to this holder (4). The casing includes core support portions for rotatably supporting the respective cores and a head support portion for supporting the transfer head (3), when the holder (4) is attached to the casing. <MATH>
