Abstract (en)

[origin: EP0695838A2] Structural element in which the integrated metal reinforcement rods (2) are arranged in recesses (5) in the extension direction and held secure by fastening elements (6,9,15) joined to the strip (4). The recesses are open slots incorporating a strip edge (8) such that the side fastening elements (6) are open in the same direction. Each holding element has a pair of oppositely placed leaf springs (8).
