Abstract (en)

[origin: EP0696826A1] The antenna (12) is mounted on a trellis beam (11) sliding in and out of a fixed section (10) of the mast. The feeder cable (13) is hooked at several points to a traction cable over a portion of its length. The traction cable has one fixing point (31) on the moving section and another fixing point (32) near the middle of the fixed section, within which a carriage (16) driven by the traction cable carries and guides a pulley (15).
