Abstract (en)
[origin: DE4407239A1] The invention relates to a steam-heated roller and a roller body (1) with a central drilling (14) and peripheral axially parallel drillings (2) to guide the steam and with at least one screwed flanged pin (3) with a central drilling (16) and connecting channels (4, 5, 6) between the central drilling (16) of the flanged pin (3) and the openings of the peripheral drillings (2) in the roller body (1) into the flanged pin (3), in which the connecting channels (4, 5, 6) branch out inside the flanged pin (3) from its central drilling (16) towards several openings in the peripheral drillings (2).
