Abstract (en)  
[origin: EP0697345A2] The sealing disc arrangement closes the pouring opening for a container. The sealing disc (2) has support tabs (9a,9b) to ensure a good seat for the gripping tab (8) in the lock (3). Retaining tabs (10a,10b,10c) are provided to give extra security for the sealing disc in the lock. The retaining tabs and the support tabs fit in a channel (16) and/or in a channel (14) of an inner thread (13) of the lock to hold the sealing disc in the lock.
