Abstract (en)
[origin: DE4410776A1] The storage device comprises a tub (10) and standing feet to keep the tub clear of the ground. The standing feet are built on the corners of the tub beyond its external outline. Corner pillars (30) can be fitted to the feet from the outside. The corner pillars have holding devices (31) at the ends opposite the feet, to which further feet or pillars can be attached. The corner pillars have fixing devices to which side walls (40) can be attached so that they are removable. The internal surfaces of the side walls end above the tub.
