Abstract (en)
The oven is used for cooking. The gap (17) is formed between the parallel plane edge parts (5a,11a) on the interior tube (3,5) and on the tube receiver frame (9,11). The edge parts are bent in a rectangular manner w.r.t. the frame. The gap is bridged at two circumferential points (23) by oppositely placed flanges (21) which are releasably joined to each other. A seal (25) is anchored along its entire length inside the gap.

Abstract (de)
Es wird eine frontseitige Verbindung eines Backrohres (3) mit einem Backrohr-Aufnahmerahmen (5) vorgeschlagen, bei der, zur thermischen Isolation dieser Teile, ein Luftspalt (17) vorgesehen ist, worin zwischen im wesentlichen parallel eingebogenen planen Randpartien (5a, 11a) einfach ein Dichtungsprofil für die Backrohrtür eingeführt werden kann. <IMAGE>
