Abstract (en)
[origin: WO9426861A1] The aim of the invention is to enhance the cleaning power of surfactant-, lipase- and builder-containing washing and cleaning agents and to increase the storage stability of the enzyme in the finished product, without recourse to components which are damaging to the environment or are difficult to handle in practice. This aim is achieved essentially by optimizing the surfactant system to give agents containing a non-ionic surfactant consisting of at least 50 % by wt. of a glycoside of the formula $R_{<1>-O(G)_n}$ in which $R_{<1>}$ is an alkyl or alkenyl group with 8 to 22 C-atoms, G is a glucose unit and n is a number from 1 to 10.
