Abstract (en)

[origin: WO9426979A1] In accordance with a method for spreading road salt, the salt is moistened prior to spreading with water according to a predetermined mixing ratio. The salt moistened with water is dispersed before spreading takes place. An arrangement for spreading road salt in accordance with this method comprises a salt reservoir (1), a water reservoir (2) and devices (3; 4) for transferring salt and water from the aforementioned reservoirs (1; 2) to a mixing station (5). In this the salt is moistened with water in an adjustable mixing ratio. There are also devices (6) so arranged as to transport the moistened salt to a spreader (7). Means (8) for finely distributing the moistened salt are provided in front of the spreader (7).
