Abstract (en)

[origin: WO9425700A1] A serried array of plank-like glazing elements (12, 13, 14) is assembled along and between two, spaced-apart, support members (10, 11). Each end of each plank-like glazing element (12, 13, 14) is located by a respective support member (10, 11) and the edges of adjacent plank-like glazing elements are mutually interconnected with a seal (18) therebetween to form a glazed structure. The plank-like glazing elements (12, 13, 14) can be assembled together without the need for glazing bars and may be angled with respect to each other to form a curved structure.
