Abstract (en)
[origin: WO9425942A1] The present invention relates to an automatic distribution store for products arranged in a storage assembly and accessible in a free service mode by a user. The storage assembly (A) is comprised of at least one series of tubular casings (19) arranged horizontally. A servo-controlled pusher arm (22) provides for the extraction of the selected product which is directed towards a fixed receptacle (23) accessible by the user.
