Abstract (en)
[origin: WO9427279A1] The present invention concerns a piano comprising a computer-controlled electric motor/sensor (31) as actuating means for each of its hammers (2). Each key of the keyboard is composed of a flat, modular motor/sensor (40) coupled to a processing system (34), the output of the motor/sensor (40) determining, by means of the processing system, the displacement of at least one of the hammer motors (31).
